

# TREATCHEM

## **Environmental Policy**

Treatchem Ltd recognises and accepts the need to develop business practices that contribute to a reduction of negative effects on the environment, in which we work and live.

Compliance with relevant environmental legislative and regulatory requirements aimed at the prevention of pollution, in respect of emissions, discharges and incidents, shall be fundamental to the Company's environmental objective.

Treatchem Ltd shall seek continuous improvement of environmental performance throughout the whole organisation, through efficient and safe use of natural resources and its commitment to ISO Environmental Management Systems.

Therefore, in keeping with the Company's guiding principles and objectives, Treatchem will endeavour to:

- To comply with environmental laws and regulations
- To conduct our operations in a manner that demonstrates respect for the quality of the environment
- To maintain effective environmental procedures and equipment consistent with available technology
- To respond quickly and effectively to environmental issues involving Treatchem products, equipment or facilities under our control
- To encourage development of products, technologies and processes that inherently provide improvement to the quality of the environment
- To develop and maintain an environmental management programme ensuring compliance with statutory requirements
- To ensure that all Treatchem employees are aware of their own responsibility for individual safety and sound environmental management
- To apply the principles of reduction, recovery and reuse whenever possible within its business activities
